the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.4 billion (United Nations, 1999).

There are a number of reasons why the world population is ageing. First, the number of people who survive to old age has increased. In 1950, the life expectancy at birth was 47 years for men and 51 years for women. By 1990, it had increased to 68 years for men and 74 years for women (United Nations, 1999). This increase in life expectancy is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.

Second, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1990, there were 0.4 billion people aged 65 and over (United Nations, 1999). This increase is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.

Third, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1990, there were 0.4 billion people aged 65 and over (United Nations, 1999). This increase is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.

Fourth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1990, there were 0.4 billion people aged 65 and over (United Nations, 1999). This increase is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.

Fifth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1990, there were 0.4 billion people aged 65 and over (United Nations, 1999). This increase is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.

Sixth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1990, there were 0.4 billion people aged 65 and over (United Nations, 1999). This increase is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.

Seventh, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1990, there were 0.4 billion people aged 65 and over (United Nations, 1999). This increase is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.

Eighth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1990, there were 0.4 billion people aged 65 and over (United Nations, 1999). This increase is due to a number of factors, including improvements in medical care, better nutrition, and a decline in the incidence of infectious diseases.
