the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion. The number of people aged 65 and over has increased from 200 million to 350 million. The number of people aged 15–64 years has increased from 1.5 billion to 2.0 billion.

There are a number of factors that have contributed to the increase in the number of people in the world who are under 15 years of age. One of the main factors is the increase in the number of people who are having children at a younger age. This is due to a number of factors, including the fact that people are having children at a younger age than in the past, and the fact that people are having more children than in the past.

Another factor is the increase in the number of people who are surviving into old age. This is due to a number of factors, including the fact that people are living longer than in the past, and the fact that people are having more children than in the past. This is due to a number of factors, including the fact that people are having children at a younger age than in the past, and the fact that people are having more children than in the past.

The increase in the number of people in the world who are under 15 years of age is a major challenge for the world. It is a challenge that requires a number of different approaches to be taken. One of the main approaches is to improve the quality of education for children. This is because education is a key factor in the development of a child, and it is a key factor in the development of a country.

Another approach is to improve the health care system. This is because health care is a key factor in the development of a child, and it is a key factor in the development of a country. This is because health care is a key factor in the development of a child, and it is a key factor in the development of a country.
