the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.4 billion (United Nations, 1999).

There are a number of reasons why the world population is ageing. First, the number of people who are aged 65 and over has increased because of the increase in life expectancy. Second, the number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive. Third, the number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive.

The increase in life expectancy is the most important factor in the ageing of the world population. The number of people who are aged 65 and over has increased because of the increase in life expectancy. The number of people who are aged 65 and over has increased because of the increase in life expectancy. The number of people who are aged 65 and over has increased because of the increase in life expectancy.

The increase in the number of people who are aged 65 and over who are still alive is the second most important factor in the ageing of the world population. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive.

The increase in the number of people who are aged 65 and over who are still alive is the third most important factor in the ageing of the world population. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive.

The increase in the number of people who are aged 65 and over who are still alive is the fourth most important factor in the ageing of the world population. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive.

The increase in the number of people who are aged 65 and over who are still alive is the fifth most important factor in the ageing of the world population. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive.

The increase in the number of people who are aged 65 and over who are still alive is the sixth most important factor in the ageing of the world population. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive. The number of people who are aged 65 and over has increased because of the increase in the number of people who are aged 65 and over who are still alive.

## Our Mission

SemoMLS.com provides real estate buyers and sellers an easy way to view properties for sale. Real Estate professionals can join, list and have access to thousands of previously sold properties.
