The first of these is the fact that the system is not a simple one. It is a complex system, and as such, it is not possible to understand it by looking at its parts in isolation. The system is a whole, and its behavior is determined by the interactions between its parts. This is a fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The second of these is the fact that the system is dynamic. It is not a static system, and its behavior changes over time. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The third of these is the fact that the system is open. It is not a closed system, and it interacts with its environment. This is another fundamental principle of systems thinking, and it is one that is often overlooked in traditional approaches to problem-solving.

The fourth of these is the fact that the system is self-organizing. It is not a system that is controlled from the outside, and it is not a system that is designed from the top down. It is a system that organizes itself, and it does so in a way that is often surprising and unexpected.

The fifth of these is the fact that the system is resilient. It is not a system that is fragile, and it is not a system that is easily disrupted. It is a system that is able to withstand change, and it is able to adapt to new circumstances.

The sixth of these is the fact that the system is sustainable. It is not a system that is designed to last for a short time, and it is not a system that is designed to be disposable. It is a system that is designed to last, and it is designed to be used in a way that is sustainable.

The seventh of these is the fact that the system is equitable. It is not a system that is designed to benefit a few people, and it is not a system that is designed to be unfair. It is a system that is designed to be fair, and it is designed to be used in a way that is equitable.

The eighth of these is the fact that the system is transparent. It is not a system that is designed to be opaque, and it is not a system that is designed to be secretive. It is a system that is designed to be open, and it is designed to be used in a way that is transparent.

The ninth of these is the fact that the system is accountable. It is not a system that is designed to be unaccountable, and it is not a system that is designed to be irresponsible. It is a system that is designed to be responsible, and it is designed to be used in a way that is accountable.

The tenth of these is the fact that the system is inclusive. It is not a system that is designed to exclude, and it is not a system that is designed to be discriminatory. It is a system that is designed to be inclusive, and it is designed to be used in a way that is inclusive.

Our Mission

SemoMLS.com provides real estate buyers and sellers an easy way to view properties for sale. Real Estate professionals can join, list and have access to thousands of previously sold properties.
